Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,6-8,11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmidt (US 5,881,686).

Schmidt discloses in the first mode, upon the downstroke of the pistons 3, positive pressure is formed and forces crankcase gas out of crankcase port 10 and along the breather hose 11. The gases enter the inlet nozzle 31 of the valve 22, and are routed through the first passageway 32 to ports 33. The gases flow through the gap G. At high pressures and flows, the elastomeric umbrella 37

flexes even further away from the seal seat 39, permitting increased flow therethrough. In the second mode, while the pistons 3 stroke upwardly, the pressure in the crankcase 7 diminishes from its previous positive pressure. Upon the crankcase pressure becoming negative, the flow of crankcase gases through the breather hose 11 reverses and begin to flow into the crankcase 7. Gas flows into the outlet nozzle 40 of the valve 22, is routed through the second passageway 41 and flows on into chamber 30. At low flows, the gases flow around umbrella 37 and through gap G. See col. 5, lines 3-20.

Allowable Subject Matter

Claims 4,5,9,10,14-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference by Kabat et al discloses positive crankcase ventilation for the crankcase of an engine.
